In newly born infants, the length and (if possible), the weight of the body to be recorded together with the state of the hair, nails and umbilical cord, its length, whether placenta is attached or not if present, its size	Body duly identified. Label checked and verified. Teeth Intact. Not applicable

10.	and condition. Condition of body – Whether well-nourished, thin or emaciated, warm or cold.	Average built. Cold body.
11.	Rigor Mortis – Well marked, slight or absent; whether present in the whole body or part only.	Well-marked in face, neck and slight in limbs.
12.	Extent and signs of decomposition: presence postmortem lividity of buttocks, loins, back and thighs or any other part. Whether bullae present and the nature of their contained fluid. Condition of the cuticle.	No signs of decomposition. Postmortem lividity present over back and buttocks except over pressure areas, not fixed.
13.	Features – Whether natural or swollen, State of eyes, Position of tongue, Nature of fluid (if any) oozing from mouth, nostrils or ears	Features – natural, stained with blood. Eyes closed. Pupil's dilated, fixed. Mouth closed. Tongue inside oral cavity. Reddish fluid oozing from nose and mouth, no oozing from nose
14.	Condition of skin – Marks of blood etc. In suspected drowning the presence or absence of cutes anserine to be noted.	Dry, blood stains at places. Peeling of skin and multiple ants bites marks present over body at place.
15.	Injuries to external genitals. Indication of purging.	External genitals – no injury. No purging.
16.	Position of limbs – Especially of arms and of fingers in suspected drowning the presence or absence of sand or earth within the nails or on the skin of hands and feet.	Body in supine position. All limbs straight.
17.	Surface wounds and injuries – Their nature position, dimensions (measured) and directions to be accurately stated- their probable age and causes to be noted. If bruises be present what is the condition of the subcutaneous tissues? (N.B. – (When injuries are numerous and cannot be mentioned within the space available they should be mentioned on a separate paper which should be signed). 1) Lacerated wound of size 5cm x 1cm x bone deep present over right frontal-parietal region midline area, margins irregular and blood infiltrated. 2) Lacerated wound of size 8cm x 1cm x bone deep present over right temporal-parietal region on lateral aspect, margins irregular and blood infiltrated with underlying depressed communicated fracture dislocation palpable. 3) Multiple abrasions present in an area of varying size from 7cm x 3cm to 0.5cm x 0.1cm presents over middle 1/3 of back, lower 1/3 of postero-lateral aspect of right side trunk and anterior aspect of upper 1/3 of right thigh at places, intermittent, irregular, reddish. 4) Multiple abrasions present in an area of varying size from 5cm x 3cm to 0.5cm x 0.1cm presents over posterior aspect of right knee, lateral aspect of right leg, intermittent, irregular, reddish with multiple post mortem ants bite marks in surrounding area at place.	
18.	Other injuries discovered by external examination or palpation as fractures etc.	Intact.
	Can you say definitely that the injuries shown against column no 17 and 18 are ante-mortem injuries?	Yes, ante mortem. Ants bites marks are post mortem in nature.

B

Final Examination-

Head--

i) Injuries under the scalp, their nature.

Diffuse Under scalp contusion hemorrhages present over right side frontal, temporal, parietal and occipital region of size 15cm x 10cm, dark reddish in colour.

Skull—Vault and base—Describe fractures, their sites, dimensions, directions, etc.

Depressed communicated Fracture dislocation of right frontal, temporal and parietal bone in an area of size 10cm x 7cm with underlying meninges torn with infiltration of about 50cc dark reddish blood and blood clots in surrounding tissue and fractured bony margins.

iii) Brain— The appearance of its coverings, size, weight and general condition of the organ itself and any found in its examination to be carefully noted (weight M1300 grams F-1275 grams).

Meninges – torn over fractured area at places.
Extra dural hemorrhage of about 20cc blood and blood clots presents over right frontal, temporal and parietal region at places, dark reddish.
Diffuse Sub Dural hemorrhage of about 100cc blood and blood clots presents over frontal, parietal, temporal and occipital regions at places over the brain, dark reddish.
Sub arachnoids hemorrhages present in the form of thin film of reddish blood all over the brain at places.
Brain: - multiple hemorrhagic contusions present in an area of size 10cm x 7cm to 2cm x 1cm present over right frontal, temporal, parietal and occipital region with infiltration of blood in brain matter with Softening of brain matter, pale and edematous.

20.

Thorax-

a. Walls, ribs, cartilages

Fracture dislocation of sternum with fracture of right side 3rd to 5th ribs and left side 3rd and 4th ribs fracture dislocated on postero-lateral aspect with infiltration of about 50cc dark reddish, blood and blood clots in surrounding tissue.

b. Pleura

Contains about 100cc reddish fluid in each pleural cavity

c. Larynx, Trachea and Bronchi

Intact. Mucosa- pale.

d. Right Lung

e. Left lung

Hemorrhagic contusions present over both lungs corresponding to overlying fracture dislocation with oozing of blood. Both - pale, edematous. On cut section- oozing of reddish frothy fluid from cut surface.

Pericardium

Intact.

Heart with weight

Intact, on cut section Coronaries patent.

Large vessels

Intact, dark blood and blood clots present.

Additional remarks

Nil.

21.

Abdomen-

Walls

Intact.

Peritoneum

Intact.

Cavity

Intact, no abnormal free fluid.

Buccal cavity, teeth, tongue and pharynx

Intact. Mucosa pale.

Oesophagus

Intact, mucosa- pale.

Stomach and its contents	Intact. Contains about 100 ml yellowish fluids, smell, mucosa- congested at places.
Small intestine and its contents	Intact. Partly distended with gases.
Large intestine and its contents	Intact. Partly distended with gases and loaded with feces.
Liver(with weight) and gall bladder	Intact, congested.
Pancreas and Suprarenals	Intact, pale.
Spleen with weight	Intact, congested.
Kidneys with weight	Intact, congested.
Bladder	Intact. Empty. Mucosa-pale.
Organs of generation	Intact - congested.
Additional remarks with where possible, medical officer's deduction from the state of the contents of the stomach as to time of death and last meal.	---
State which viscera (if any) have been retained for chemical examination and also quote the numbers on the bottles containing the same.	Routine Viscera not preserved. Bottle No.-1 - bottle containing blood for chemical analysis.
22. Spine and Spinal cord-	Fracture dislocation of cervical vertebra at the level of C3-C4 and thoracic vertebra at the level of T4-T5 fracture dislocated with corresponding contusions over spinal cord with infiltration of blood and blood clots in para vertebral muscles and surrounding tissue of about 50cc dark reddish blood

Opinion as to the cause of death:-

"HEAD INJURY"

 Dr PRATHAMESH A UMREKAR
 (Resident Doctor)
 Autopsy Surgeon
 Department of Forensic Medicine,
 Govt. Medical College, Aurangabad

Dated: 28-May-19

*The Spinal Cord need not be examined unless there are any indications of disease, Strychnine poisoning or injury.

Note— The report must be written and signed immediately after the examination.

PM No.: 1151/2019 Date: 28-May-19, ADR. No.: 27/2019, u/s 174 CrPC and copy forwarded to I.O. of P.S.: CHIKALTHANA, AURANGABAD. CM 67.e
